

More HTTP Request Options

Christian Wenz

Consultant, Software Architect

@chwenz

```
npm install redux-thunk
```

```
export function addCart(id) {  
  return async function addCartThunk(dispatch, getState) {  
    }  
}
```

Going Async

Using Redux Thunk

Axios

```
import axios from "axios";

axios.get("/path/to/api")
  .then(response => { /* ... */ });

axios.post(
  "/path/to/api",
  { name: "value" })
  .then(response => { /* ... */ });
```

```
axios(  
  {  
    url: "/path/to/api",  
    method: "POST",  
    data: data,  
    headers: { "Content-Type": "application/json" }  
  });
```

Axios Options

Demo

Adding the axios HTTP client to the application

Summary

Use Fetch API for HTTP requests

Axios HTTP Client provides extra features
